1. The first part of the paper is devoted to a general discussion of the problem.

2. In the second part, we consider the case of a single particle. We show that the motion of a particle in a magnetic field is equivalent to the motion of a particle in a potential field.

3. In the third part, we consider the case of a system of particles. We show that the motion of a system of particles in a magnetic field is equivalent to the motion of a system of particles in a potential field.
